MURDOCH-KERR PRESS,
PITTSBURGH

History.

The Western University of Pennsylvania is the oldest institution of learning, with one exception (the University of Nashville) in the United States west of the Appalachian Mountain range. It came into being as the Pittsburg Academy in the year 1786 and was formally incorporated by Act of Legislature in February, 1787. It was re-incorporated as the Western University of Pennsylvania in February, 1819. It has educated in whole or in part more than six thousand of the young men of Western Pennsylvania and adjacent States, and its alumni have filled many of the most distinguished offices in the gift of the Commonwealth and the nations.

The growth of the institution has been rapid in more recent years and the University is to-day the most largely attended institution of learning in its class in the State of Pennsylvania, with the single exception of its sister institution—University of Pennsylvania, located in Philadelphia.

The University has the following departments:

Collegiate and Engineering Department.
Department of Law.
Department of Medicine.
Department of Pharmacy.
Department of Dentistry.

Summary of Students by Departments, Session of 1902-1903.

Collegiate	115
Engineering	109
Law	101
Medicine	315
Pharmacy	118
Dentistry	200
Total	958

Board of Trustees.

The Board of Trustees of the Western University of Pennsylvania, incorporated the 18th day of February, 1819, is a self-perpetuating body, consisting of thirty members, each holding office for three years, with the addition of the Mayor of Pittsburgh, the Mayor of Allegheny, and the Chancellor of the University, who are ex officio members. One-third of the thirty elected members go out of office each year, at the date of the annual meeting, when their successors are elected by the Board. The term of office of members of Class I. expires in 1901; of Class II. in 1902; of Class III in 1903.

CHRONOLOGICAL LIST.

When first elected.	Class.		Residence.
1856	II.	Rev. John G. Brown, D.D.	Pittsburgh
1882	II.	Rt. Rev. Cortland Whitehead, D.D.	Pittsburgh
1882	I.	Rev. John Crocker White, D.D.	Pittsburgh
1883	III.	Rev. E. P. Cowan, D.D.	Pittsburgh
1885	II.	Rev. John W. Sproull, D.D.	Allegheny
1889	II.	W. J. Holland, D.D.	Pittsburgh
1890	I.	Benjamin Thaw	Pittsburgh
1891	II.	John A. Brashear, Sc.D.	Allegheny
1891	III.	Thos D. Carnahan, Esq.	Pittsburgh
1891	III.	Hon. J. H. Reed	Pittsburgh
1892	III.	Cyrus B. King, M.D.	Allegheny
1893	III.	A. W. Mellon	Pittsburgh
1893	I.	J. C. Dunn, M.D.	Pittsburgh
1894	I.	Daniel H. Wallace	Pittsburgh
1894	I.	W. Lucien Scaife	Allegheny
1895	III.	James H. Lockhart	Pittsburgh
1895	I.	Andrew Carnegie, LL.D.	New York City
1895	III.	Rev. Lippman Mayer, D.D.	Allegheny
1896	III.	A. C. Robertson	Pittsburgh
1896	I.	Robert Pitcairn	Pittsburgh
1898	II.	William McConway	Pittsburgh
1898	I.	Josiah Copley Thaw	Pittsburgh
1898	II.	Allan C. Bakewell	New York City
1900	I.	J. D. Layng	New York City
1900	II.	Calvin Wells	Allegheny
1901	III.	Emil A. Schaefer	Pittsburgh
1901	III.	Nelson C. Wilson	Allegheny
1902	I.	J. M. Duff, M.D.	Pittsburgh
1902	II.	George H. Clapp	Pittsburgh
1902	II.	Alexander Dempster	Pittsburgh
1902	III.	Hon. J. D. Shafer	Pittsburgh

Board of Trustees of the Pittsburgh Dental College.

H. W. ARTHUR.. .. ..President
J. H. BEAL.. .. ..Vice-President
STEWART L. McCURDY.. .. ..Secretary
W. H. FUNDENBERG.. .. ..Treasurer
G. L. SIMPSON.. .. ..

Calendar for 1903-1904.

Infirmary opens September 2d.

Winter term begins October 1st, and continues for seven months.

Thanksgiving vacation, November.

Holiday vacation from December 20th at 12 M. to January 5th, 1904, at 9 A. M.

Washington's Birthday recess, February 22d.

Commencement, Friday, April 30th, 1904.

Spring term begins May 3d, 1904.

Faculty.

JOHN A. BRASHEAR, Sc.D.,
Acting Chancellor.

H. W. ARTHUR, D.D.S.,
Professor of Dental Anatomy, Operative Dentistry and Technics.

WALTER H. FUNDENBERG, D.D.S., Dean,
Professor of Prosthetic Dentistry and Orthodontia.

STEWART L. McCURDY, A.M., M.D., Secretary,
Professor of Anatomy, Oral and General Surgery.

J. H. BEAL, Sc.D., Pharm.D.,
Professor of Physics, Chemistry and Metallurgy.

THEODORE DILLER, M.D.,
Professor of Physiology and Embryology.

CLEMENT R. JONES, M.D.,
Professor of General Pathology, Materia Medica and Therapeutics.

O. L. HERTIG, A.M., D.D.S.,
Professor of Dental Pathology and Therapeutics, and Operative Clinician.

Lecturers.

DON S. LEET, D.D.S.,
Lecturer on Dental Histology.

E. W. ARTHUR, A.B.,
Lecturer on Dental Jurisprudence.

RUSSELL H. BOGGS, M.D.,
Lecturer on Electricity and Roentgen Rays.

Demonstrators and Assistants.

CHARLES R. FUNDENBERG, D.D.S.,
Demonstrator of Prosthetic Dentistry.

DAVID T. JENKINS, M.D.,
Demonstrator of Anatomy.

JESSE A. PENNINGTON, D.D.S.,
Demonstrator of Clinical Dentistry.

H. H. MYERS, D.D.S.,
Assistant Demonstrator of Operative Dentistry.

E. C. HAWKINS, D.D.S.,
Assistant Demonstrator of Prosthetic Dentistry.

H. D. HOWARD, D.D.S.,
Assistant Demonstrator of Dental Ceramics.

T. A. HOGAN, D.D.S.,
Assistant Demonstrator of Anatomy.

SCOTT H. DOUTHETT, D.D.S.,
Assistant Demonstrator of Operative Dentistry.

ALEXANDER E. BARD, D.D.S.,
Demonstrator of Operative Technics.

W. S. CLARK, D.D.S.,
Demonstrator of Histology, Pathology and Bacteriology.

ROBERT ZUGSMITH, D.D.S.,
Demonstrator of Orthodontia.

PROF. SAMUEL ANDREWS, Supt. Pittsburgh Public Schools,
Examiner of Students who desire to enter this College.

General Information.

The Pittsburgh Dental College is the Dental Department of the Western University of Pennsylvania. Its classes, however, are conducted independently of the other departments.

Senior students who have passed the required grades and have otherwise complied with the rules of the College are recommended by the Faculty of the department to the Board of Trustees of the University for their degree, the same being conferred by the Chancellor.

Diplomas are signed not only by the Faculty of the Dental Department, but also by the Chancellor and President of the Board of Trustees, and to them is attached the seal of the University.

Candidates for the degree of D.D.S. must attend four full courses of lectures in some reputable dental college, the last one of which must be in this school. He must be 21 years of age, and of good moral character.

Requirements for Admission.

Extracts from Code of Rules of the National Association of Dental Faculties:

"The minimum preliminary educational requirement of colleges of this Association shall be a certificate of having passed the second year of a high school, or its equivalent, the preliminary examination to be placed in the hands of any state or county superintendent of public instruction."

"No member of this Association shall give credit for a full course to students admitted later than ten days after the opening of the session, as published in the announcement."

"That students in attendance at colleges of this Association, to obtain credit for a full term, must be and remain in attendance until the close of the session."

Admission to Advanced Standing.

Students will be admitted to the second, third or fourth year course, who present certificates from recognized dental colleges, of attendance upon full courses of lectures of at least seven months, and of examinations in the studies of the pre-

ceding year or years' course in this college satisfactory to the professors of the respective departments.

Graduates of reputable medical colleges will be admitted to the second year course and will be excused from lectures and examinations upon General Anatomy, Chemistry, Physiology, Materia Medica and Therapeutics; but will be required to take the courses in Operative and Prosthetic Technics, and Special Anatomy.

Course of Study, with Branches Taught.

Freshman Year.

Anatomy
Two lectures per week.
- Osteology, Arthrology — Ante-Holiday.
- Myology, Angiology — Post-Holiday.

Laboratory. Throughout the year.
Physics and Electricity.
Dental Anatomy, completed.
Operative Technics.
Prosthetic Technics.

Sophomore Year.

Anatomy
Two lectures per week.
- Brain, Nervous System — Ante-Holiday.
- Viscera, Special Organs — Post-Holiday.

Dissection. Two parts.
Embryology, completed. Ante-Holiday.
Histology, completed. Post-Holiday.
Materia Medica. Throughout the year. Lectures and Laboratory.
Chemistry. Inorganic. Lectures and Laboratory.
Comparative Dental Anatomy.
Operative Dentistry.
Prosthetic Dentistry.

Junior Year.

Physiology. Throughout the year. Lectures and Laboratory.
Metallurgy.
Regional Anatomy. Ante-Holiday. Dissection. One part.
Principles of Surgery. Post-Holiday.
Bacteriology.
General Pathology. Lectures and Laboratory.
Dental Histology.
Practical Crown and Bridge Work.
Practical Metal Work.
Dental Ceramics.
Operative Dentistry.
Prosthetic Dentistry.
Physical Diagnosis.
Anæsthetics.
Dental Materia Medica.
Local Anæsthetics.
Infirmary Practice.

Senior Year.

Dental Pathology.
Dental Therapeutics.
Oral Surgery.
Clinical Surgery.
Jurisprudence.
Applied Electricity, including Roentgen Rays.
Operative Clinical Practice.
Continuous Gum Obturators and Artificial Dentures.
Orthodontia.
Prosthetic Dentistry.
Organic Chemistry.

Operative Technics.

PROF. W. H. ARTHUR.

The object of this course is to make the student thoroughly familiar with the organs to be operated upon, together with the principles that underlie all operations upon the teeth, and to provide a systematic course in manual training.

Students will have before them teeth of each denomination, so that right conceptions of form and the relations of the tissues may be studied.

Systematic nomenclature will be impressed upon the mind.

Shaping the definite outlines, markings, and the cutting of sections of each tooth will be practiced.

Shaping cavities, from the simple to the more complex, on models and the teeth in forms, using the different filling materials in common use.

Scaling, bleaching, and, as far as possible, all manipulation of the operative procedure.

Every student will be required to perform each operation separately in an acceptable manner.

This course will be under the immediate direction of the Professor of Operative Dentistry and Technics.

Operative Dentistry.

The principles and practice will be taught by the application of systematic procedures to operations in classes, so that a correct judgment may be formed as to their application in particular operations.

The same method of instruction will be applied by clinical instructors, students in classes being divided into sections.

Modern and accepted methods will be exemplified.

The infirmary is open throughout the year, except during the month of August.

Instruments.

Each student, before beginning his work, is required to procure the instruments necessary for his use, a list of which will be furnished. Each Senior student is required to have a dental engine.

All materials used upon patients, including medicines, napkins, rubber dam, etc., furnished by the college.

Dental Prosthesis.

PROF. W. H. FUNDENBERG.

The course will cover Technics, followed by the preparation of the mouth for dentures, impressions, methods of constructing various bases, treatment of metals and alloys which may be of value in dentistry, Continuous Gum Work, the study of temperaments in their relation to the teeth and their arrangement. Crown and Bridge Work, Artificial Velæ, method of making and adjusting appliances for fracture of the maxillæ. Besides the patients in the clinic, living models are employed for the students to work upon.

Orthodontia.

The correction of irregularities of the teeth and the prevention of dental deformities will receive special attention by lectures and clinics from the Chair of Prosthetic Dentistry.

The most approved methods of constructing appliances will be illustrated by lantern slides, drawings, models, and practical cases.

Dental Ceramics.

In this field of dental art, the future of which promises so much, the student will have opportunity for special instruction in all branches of porcelain work, from the making and burning of the smallest porcelain filling to the construction of a full denture of continuous gum. No extra fee is required. A room devoted exclusively to this work is equipped with all varieties of furnaces, including gasoline and electric.

Anatomy.

PROF. STEWART L. M'CURDY.

Outline of Course.

Freshman Year, Ante-holiday, Osteology and Syndesmology; Post-holiday, Muscles, Blood Vessels.

Junior Year, Ante-holiday, Nervous System; Post-holiday, Organs or Special Sense and Viscera.

Instruction in this department consists of lectures and demonstrations of the anatomy of the entire body, special lectures being given upon regions of the face, head and neck.

Surgical and Topographical Anatomy of face receives special attention as the study of the various parts is considered.

Students are required to make a complete dissection during the Junior and Sophomore years.

To facilitate the study of Anatomy, boxes containing a half skeleton are given the student upon a deposit of $5.00, returnable upon return of box and the contents as it was received; or, student may keep the box, if he so desire, at no extra cost.

General and Oral Surgery.

Outline of Junior Course of Lectures.

1. General Principles, including Repair.
2. Acute Infections and the Results.
3. Surgical Fevers.

4. Erysipelas.
5. Shock.
6. General Diagnosis.
7. Diseases of the Vascular Systems.
8. Asepsis and Antisepsis.
9. Anæsthetics.
10. Principles in Operations, Wounds and Emergencies.

Outline of Senior Course of Lectures.

11. Diseases of the Structures of the Oral Cavity.
12. Diseases of the Antrum and other Cavities.
13. Diseases and Injuries of the Gums and Alveolar Process.
14. Diseases and Injuries to the Tongue.
15. Diseases, Injuries and Neuroses of the Face.
16. Congenital Defects of the Face and Mouth.
17. Diseases of Bone.
18. Tuberculosis.
19. Venereal Diseases.
20. Diseases of the Salivary Glands.
21. Neuralgia.
22. Tumors.
23. Ankylosis.
24. Fractures.
25. Dislocations.
26. General Conditions Producing Oral Manifestations, and Oral Diseases Producing General Symptoms.
27. Plastic Surgery.
28. Prosthesis.

Operations in hospitals and clinical cases at the College will give the student an opportunity to make a practical study of cases.

A course in Physical Diagnosis is given in order that graduates of this school may be able to make an intelligent examination of the heart and lungs preparatory to the administration of an anæsthetic.

General Physics.

PROF. J. H. BEAL.

Properties of matter, theory of constitution of matter, states of matter, physical measurements, metric system of measures, volume, mass and density, specific gravity, force and equilibrium, hydraulics, hydrostatics and pneumatics, motion, velocity and

acceleration, composition and resolution of forces, Newton's laws, gravitation, work, energy and power, machines, temperature and thermometry, specific heat, effects of heat, sound, radiant energy, light, electrostatics, electro-kinetics, sources of electric current, properties of electric current, uses of electric currents, dental applications of electricity.

General and Inorganic Chemistry.

Lectures, recitations and laboratory pratcice. The course is begun with a brief review of the history of the subject, the scope of the science, and its relation to the other physical sciences and to dentistry, with a consideration of the notation and nomenclature employed in modern chemistry. When this preliminary work has been accomplished, the important elementary substances are taken up in the order of their natural classification, and separately lectured upon. Contemporaneous with the lectures, every member of the class receives laboratory practice, which includes the preparation (when possible) of each element in the free state, the study of its leading characters and of its characteristic reactions. When the elements have all received consideration in this manner the class is given a brief drill in qualitive analysis, with practice in the identification of inorganic chemical substances in simple mixtures.

Metallurgy.

Lectures, recitations and laboratory practice. The work is carried on with lectures and recitations from lessons assigned from the text-book. After the general principles of the subject have been reviewed, the manufacture and properties of amalgams and alloys receive consideration, followed by a study of the individual metals and their uses and application in dentistry, with laboratory practice in identification of metals, and in the manufacture and assay of alloys and amalgams.

Organic Chemistry and Chemistry of Anaesthetics.

Lectures, recitations and laboratory practice. The lectures and recitations will be devoted to a consideration of the general principles of the chemistry of the Carbon Compounds, their classification and uses. In the laboratory the student is expected to prepare a series of the more important members, and to study their principal reactions and means of identification.

Physiology.

PROF. THEODORE DILLER.

Two lectures and one recitation will be given each week by the Professor of Physiology. The lectures will be illustrated by numerous drawings and models, and, wherever practicable, by experiments. In the recitation students will be questioned upon all the points touched upon in the lectures.

Students of both Sophomore and Junior classes attend the lectures and recitations upon physiology, and both are examined at the end of the year.

In this examination the Sophomore are expected to exhibit a knowledge of the more elementary truths of physiology, while the Juniors must show acquaintance with the entire subject.

Materia Medica.

PROF. CLEMENT R. JONES.

During the early portion of the Freshman year special attention will be given to the definition of words and phrases, their derivation and signification with reference to their use in Materia Medica, Therapeutics and Pharmacy. After this, the most important drugs in general use will be taken up and considered separately, with reference to their physiological effects, doses, methods of administration, their toxic effects, antidotes, etc. The same method of teaching is continued through the Junior year.

General Pathology and Therapeutics.

A thorough knowledge of General Pathology is necessary before the more advanced branches or special branches can be properly understood. Hence the object of the teaching in this department is to unfold to the student the fundamental principles of the subject, and bring them within his comprehension; also to increase his interest in the study of the subject, to obtain a knowledge of the inception and course of pathological processes, their changes and effects upon the organism as manifested in abnormal lesions.

Dental Pathology, Materia Medica and Therapeutics.

PROF. O. L. HERTIG.

Lectures from this chair will comprise instruction in the principles of Dental Pathology, indication and elements of disease, Pathological dentition, Pathological eruptions, Dental

Caries and its results, Odontalgia, Periodontitis, Alveolar abscess, Necrosis, Pyorrhœ Alveolaris, and all the various diseases of the teeth, and associate parts, with the therapeutic agents and materials used in the treatment and correction of the same.

Dental Histology.

DR. DON S. LEET.

Lectures on Dental Histolgy embrace the origin, development, tissue and the functions of the teeth, and the development of the superior and inferior maxillary bones.

These lectures are fully illustrated by lantern slides.

Dental Jurisprudence.

MR. E. W. ARTHUR.

The course of lectures on this branch will cover the subjects of Dental Witnesses, Rights and Liabilities of Dental Practitioners, including the Law of Crimes, Negligence, and Contracts, as applied to the Practice of the Profession, together with a discussion of the History of Dental Legislation in General, and of the Statutes in Force in Pennsylvania Regulating the Practice of Dentistry.

The aim will be to furnish a correct idea of the general principles of the law as applied to the practice of Dentistry, and to present the subject with a view to making it of practical worth. Students will be required to keep concise, but complete notes of the lectures.

Electricity—X-Ray.

DR. RUSSELL H. BOGGS.

X-Ray and electricity, as applied to dentistry, has been added to the list of branches taught in the college. The students will be taught the uses of radiography and will be given instruction in preparing and developing plates after they are made. The course will cover instruction in Electro-Physics, Electro-Physiology and Electro-Therapeutics and the control of electricity as a motor power.

Laboratories.

Microscopy and Histology—Sophomore Year.

Lectures, recitations and laboratory practice. The work in microscopy is preparatory to the subject of histology, and consists of a course of lectures upon the construction and manipulation of the compond microscope, with practice by the student in preparation

of temporary and permanent mounts, including the technique of embedding, sectioning and staining, both of hard and soft tissues.

The laboratory is suplied with micrscopes and all the apparatus necessary to render the student familiar with the subject of microscopical technology, as well as the normal Histology of the various tissues and organs of the body.

Special opportunities are offered for original investigation and research.

The course of Histology is obligatory upon the students of the second year, and they will undergo an examination at the close of the course.

Students are required to mount at least twenty-five slides.

Pathology and Bacteriology—Junior Year.

Students are required to mount at least twenty-five slides of pathological conditions, including tumors, diseases of the liver, kidneys, lungs, etc.

The bacteriological laboratory is equipped with a high-power microscope, containing oil-imersion lens, Abbe condenser and iris-diaphragm. It also contains incubator, dry and moist sterilizers, and every variety of apparatus known to modern bacteriology.

Students are taught rapid staining and mounting of secretions, principles of sterilization, method of isolating bacteria, technique of making plates, study of colonies, staining, mounting and examination of the more common varieties of bacteria, with special reference to bacteria found in the mouth.

Examinations.

Examinations are held on the various branches taught, in a given year at the close of that term.

The marking for examination is based on a scale of 100. Students, to pass their class examinations, must attain an average grade of at least 70 and must not fall below 60 in a single study.

Students of the Freshman, Sophomore and Junior classes falling below 60 in any study will be given the privilege of a second examination before the opening of the next winter term. A student may, however, be admitted to the class in advance if he be conditioned upon not more than two branches; but he must, during the term, pass examination in these branches before he can be examined on the studies of the year upon which he has entered.

Graduation.

Candidates for the degree of Doctor of Dental Surgery must have attended four full courses of lectures in a regular dental col-

lege, or its equivalent (as required by the rules of the National Association of Dental Faculties), the last of which must have been in this institution. They must be twenty-one years of age and of good moral character and must bring before the professors of Prosthetic and Operative Dentistry such evidence of proficiency in practical dentistry as they may require. *Beginning with the session of 1903-1904, students will be required to attend four full courses of lectures.*

Regular Term.

The regular winter term begins October 1, 1903, and continues for seven months, or until May 1, 1904.

STUDENTS MUST MATRICULATE BEFORE OCTOBER 10TH, TO OBTAIN CREDIT FOR THE TERM, EXCEPT IN CASE OF SICKNESS. PHYSICIAN'S CERTIFICATE, 10 DAYS ALLOWED.

Students who fail to enter their names on the matriculation book or make application for admission before October 10th, may enter upon the payment of $50.00, which amount will be deducted from the term ticket fee of the succeeding year. No time credit can be given upon such attendance.

Fall and Spring Terms.

The infirmary is open from September 1st to July 1st of the following year. During this time patients in abundance are furnished the students for practical work. During the Spring and Fall terms, the Sophomore and Junior classes have an opportunity to complete their requirement in practical work. During these courses daily clinics are given by the Professors and Demonstrators.

Text-Books.

Freshman Year.

ANATOMY—Gray.
DENTAL ANATOMY—Black.
PHYSIOLOGY—Huxley.
MATERIA MEDICA AND THERAPEUTICS—Potter.
DENTAL PROTHESIS—American Text-Book or Richardson.
CHEMISTRY—Beal, Simon.
DICTIONARY.

Junior Year.

DENTAL HISTOLOGY—Broomell.
ORAL SURGERY—McCurdy.
BACTERIOLOGY—McFarland.
METALLURGY—Beal, Essig or Hodgens.

Senior Year.

DENTAL PATHOLOGY AND THERAPEUTICS—Burchard or Barrett.
DENTAL MEDICINE—Gorgas.
ORTHODONTIA—Gilford or Angle.
OPERATIVE DENTISTRY—Kirk.

Notes.

Seats and laboratory privileges are assigned in order of matriculation.

Since Distilled Water is furnished for drinking purposes, there need be no fear of contracting fevers or other diseases.

The Faculty will be glad to advise parents, when so desired, of the progress and general conduct of students.

Fees.

Freshman Year.

Matriculation (paid but once)	$ 5.00
Term ticket	100.00

Sophomore Year.

Term ticket	$100.00
Chemistry (including breakage)	2.00
Histology (including material)	2.00

Junior Year.

Term ticket	$100.00
Metallurgy	2.00
Pathology and Bacteriology (including material)	2.00

Senior Year.

Term ticket	$100.00
Pathological Chemistry (including Urinalysis)	2.00
Graduation and Diploma	30.00

Fee for dissecting, $5.00 per part.

There are no extra fees.

According to the regulations of the College no fees are returnable. Should the student discontinue his studies, any fee or fees paid will hold good for a subsequent course, but they are not transferable.

Fees are payable in two installments; $50.00 at the time of entering, and no student is formally entered until this fee is paid;

$50.00 during the month of January. No student is permitted to enter upon final examinations at the close of the term without a ticket of admittance, which is evidence that all fees are paid, and that they have passed all previous examinations. Graduation fee is returnable to those who fail to pass.

A deposit of two dollars is required from each student to constitute a damage fund, out of which school property damaged by students is repaired, when the particular offender is unknown. At the end of the year the balance is refunded.

Grades and cards are withheld from students who have not complied with all the rules of the College.

Checks should be made payable to the Pittsburgh Dental College.
